

Objective

- My objective is to obtain a Lead Technician role within an MSP or freelance capacity to deliver high-quality technical solutions, streamline operations, and enhance client satisfaction through proactive problem-solving and expert systems management.

Education

HIGHSCHOOL | 2014-18 | IMLAY CITY HIGHSCHOOL

- During high school I participated in many extra-curricular activities including but not limited to softball, basketball, student planning services, video services, and assisted in the MSHAA battle of the fans each year.

VOCATIONAL SCHOOL | 2016-18 | LAPEER COUNTY EDUCATION TECHNOLOGY CENTER

- Related coursework: Students in the Information Technology, networking and emerging trends class will cover skills for the CompTIA A+ certification, networking, and cybersecurity skills for the CCNA certification, and programming in Python, C++, and Java languages.

COMPUTER INFORMATION SYSTEMS | CURRENT 122 CR | SAGINAW VALLEY STATE UNIVERSITY

- Major: Computer Information Systems - Minor: Cyber Security
- Related coursework: Education based in various programming languages, database systems, systems analysis and design that prepares you for a range of challenging career paths in industries including healthcare, education, insurance and more.

Skills & Abilities

MANAGEMENT

- My management skills have grown through both my experience as a McDonald's supervisor and my work in IT. I've led teams, delegated tasks, prioritized workloads, and ensured smooth operations in fast-paced environments while maintaining strong customer and client support.

CRITICAL THINKING

- My critical thinking skills have been essential in both my role as a McDonald's supervisor and in IT within a fast-paced MSP environment. As a supervisor, I regularly deescalated situations, evaluated challenges quickly, and resolved issues involving customers and staff. In IT, I apply the same problem-solving approach to efficiently diagnose and resolve networking and software issues, minimize downtime, and maintain reliable system performance for clients.

LEADERSHIP

- Throughout my career, I've demonstrated strong leadership by serving as a team captain in both softball and basketball, as well as working as a head lifeguard and a shift manager at McDonalds where I managed shift rotations and team coordination. These experiences translate directly into leading a team of IT professionals—organizing workloads, mentoring team members, fostering collaboration, and ensuring efficient operations while maintaining high performance standards.

Experience

FREELANCE | 2014 – CURRENT

- As a seasoned freelance web designer and developer, I possess a unique combination of skills, including designing visually stunning websites, hard coding HTML, JS, CSS for websites, setting up personal networks, and hard coding JAVA SRC's for modded video games. With a strong attention to detail and a collaborative approach, I pride myself on delivering projects that exceed client expectations and elevate their online presence.

SHIFT SUPERVISOR | MCDONALDS | 2018 - 2023

- Responsible for monitoring training and development of new employees on shift. Assisted with labor management costs. Led each shift by delegating duties, assigning tasks, and following up with all team members. Managed time effectively and able to meet all job responsibilities effectively.

LEVEL II TECHNICIAN | TURNER TECHNICAL SERVICES | 2023 - 2024

- Responsible for overseeing Level 1 support operations, escalating and resolving complex technical issues, managing client environments (servers, networks, cloud, and security), mentoring junior technicians, coordinating projects and deployments, ensuring SLA compliance, and maintaining proactive monitoring, documentation, and client communication to deliver reliable and secure IT services.

LEAD TECHNICIAN | AFFORDABLE IT SERVICES | 2025 - CURRENT

- Responsible for overseeing Level 1–2 support operations, escalating and resolving complex technical issues, managing client environments (servers, networks, cloud, and security), mentoring junior technicians, coordinating projects and deployments, ensuring SLA compliance, and maintaining proactive monitoring, documentation, and client communication to deliver reliable and secure IT services.
